

PUBLIC WORKS DEPARTMENT

To: La Center 2024 La Center Manhole Repair on Alder Street Project Bidders

Project: 2024 Manhole Repair on Alder Street Project

Date: April 8th, 2024

Item: Addendum #1

1-07.23 Traffic Control

The following are the added items for the addendum-shown as bold text:

At least one travel lane shall be maintained at all times during daily work by the contractor. At the end of the work day, two lanes of travel will be required to be open until the next day of work on this project. **As an option, the contractor can propose a detour around the project during the day. Both lanes will need to be open at the end of the work day, if a detour is proposed.** The contractor will have to propose a traffic control plan that shows the lane closures, complying with the WSDOT Traffic Control Plan included in this project, and requirements in WSDOT 2023 Standard Specifications for Construction. The city will need to review the plan to determine if it is acceptable before implementation.

No additional compensation will be paid to the contractor, for using a detour. The unit cost for a lane closure or detour will be paid as lump sum per the "Project Temporary Traffic Control" bid item.

Sincerely,

A handwritten signature in cursive script that reads "Anthony Cooper".

Anthony Cooper, PE
City of La Center
City Engineer/Assistant Public Works Director
