Ben,  
Final Archaeological report has been submitted to DAHP. Refer to Eva, with AINW, note below.  
Let me know what else we can do to support the effort.

Keith,

The addendum report has been submitted to DAHP under project number 2018-04-02839. We can help you coordinate SEPA and USACE review, as needed, once the project is ready for environmental review. Is it time for that? I will be happy to reach out to DAHP and USACE and let them know the reports are available for review.

Keith,

We have received the Smithsonian number for the archaeological site in the La Center Middle School project area. It is officially site 45CL1373. We have updated the report and added a DAHP cover sheet. We will upload the attached final report to DAHP's WISAARD system on behalf of the project.

Keith,

Thank you for your call just now. We will submit the site form, get the Smithsonian number, and finalize the report. I understand that your team is shifting the driveway to avoid the site. If you would like out GIS data to share with your design team, we will send it along. I am delighted that the school is interested in using the archaeological history of the property as a teaching opportunity, and we will be happy to help with that effort when the time comes.

Keith,

I have attached our draft of the addendum survey report for La Center Middle. With your permission, we will submit the archaeological site form to DAHP and request a Smithsonian number for the site. Then we can finalize the report.

The next steps will depend on the permitting for the project:
