Heritage B Parking Lot Photometrics  
419 East Cedar Avenue  
La Center, WA 98629

Photometrics are based on existing Spero RW20 100 watt metal Halide fixture.

Readings taken with Illumintaor FX-200.

Adding 1 pole to the east of the parking lot. This light will be half shielded toward the east.

The light output of the shielded east area of the new fixture would be as follows:

5' - .8 lumens  
10' - .4 lumens  
20' - .2 lumens

The light output of the unshielded portion of the light facing the west toward the parking lot would be as follows:

5' - 12 lumens  
10' - 10 lumens  
20' - 8 lumens
