

**NOTICE OF APPLICATION
AND LIKELY SEPA MITIGATED DETERMINATION OF NON-SIGNIFICANCE
Breeze Creek Trails Subdivision Type III Preliminary Plat, SEPA,VAR, LLD,CAR and Tree Cutting Permit
(File# 2024-012-SUB/SEPA/VAR/CAR/TRE)**

Description of proposal: The applicant is proposing to subdivide the site to create 15 single-family detached residential lots. The site is designated Urban Holding 10 acre minimum (UH-10) on the City's Comprehensive Plan map and is zoned Low Density Residential (LDR-7.5) on the City's adopted zoning map. The site is located on approximately 4.87 acres. The lots range in size from 6,025 square feet to 9,897 square feet. The applicant is utilizing the density transfer provision. The site will be served by one public road (East 2nd Way) extending west from Holly Park Subdivision. An existing, historic access to the home on parcel 209481000 will remain. The applicant's preliminary plat appears to show six (6) Tracts (Tract A, B, C D, E & F) that are located within a riparian buffer area. The site contains a fish and wildlife habitat conservation area, which is a 200 foot riparian buffer from an offsite, Type-F stream. The site is also within a category 2 critical aquifer recharge area (CARA), as is most of the City of LaCenter. There are not specific requirements for residential development regarding category 2 CARA's. The site also contains a Type IV wetland and geologically hazardous areas for landslide and erosion hazards.

Likely SEPA DNS: NOTICE IS HEREBY GIVEN that, an application has been submitted as noted below and based on a review of that application, the City of La Center expects to issue a Mitigated Determination of Non- Significance (MDNS) for this proposal pursuant to the "Optional DNS process" allowed by State Law (WAC 197- 11-355) and the La Center Municipal Code (LCMC 18.310). A copy of the determination may be requested now and will be mailed when available. Comments received within the deadline, will be considered in the review of the proposal and the State Environmental Policy Act (SEPA) environmental checklist. ***This may be the only opportunity to comment on the environmental impacts of the proposal and no additional comment period will be provided, unless probable significant environmental impacts are identified during the review process, which would require additional study or special mitigation.*** The proposal may include mitigation under applicable codes, and the project review process may incorporate or require mitigation measures.

Any person has the right to comment on this application, receive notice of and participate in any hearings, request a copy of the decision once made, and appeal the final SEPA determination of the project. **Written comments submitted by 5:00 PM on September 5, 2024 will be considered in the application and final SEPA determination.** Please send comments to the City of La Center, Community Development, 210 E 4th Street, La Center, WA 98629 or by email to Angie Merrill, Associate Planner, at amerrill@ci.lacenter.wa.us

Application: Breeze Creek Trails Type III Preliminary Plat, SEPA, Critical Areas Permits, Variance, Tree Cutting Permit (File# 2024-012-SUB/SEPA/CAR/ VAR/TRE)

Application date: August 22, 2024

Technically Complete: August 8, 2024

Proponent: Representative: Scott Taylor, SGA Engineering, 2004 Broadway, Vancouver, WA 98663.

Property Owner/Applicant: Peter Schlentz, Breeze Creek Trails LLC, 19158 Kristen Way, San Antonio, TX 78258

City of LaCenter Associate Planner: Angie Merrill – amerrill@ci.lacenter.wa.us - 360.263.3654

City of LaCenter Engineer – Anthony Cooper – acooper@ci.lacenter.wa.us – 360.263.2889

Location of proposal: No Site Address. #49 John Timmons & Timmons & Andrew Breezee HD CL 4.87 AC, NE ¼ . Section 6, Township 4 North, Range 1 East of the Willamette Meridian

Public Hearing: A public hearing is required and is scheduled for October 22, 2024 at 6:00pm. A separate notice will be provided at least 14 days in advance of the public hearing, to include additional information regarding the hearing instructions.

Existing Environmental Documents relied upon: SEPA requires that a review of the potential environmental impacts be conducted. City staff and interested agencies will review the proposal for compliance with applicable state requirements and city codes. Through this process, a determination will be made as noted under the following statement of determination.

The following environmental documents were relied upon in the City's assessment of a likely determination of non-significance: SEPA Environmental Checklist dated, April 24, 2024; Narrative ;Preliminary Technical Information Report; Geotechnical Site Investigation; Preliminary Erosion Control & Grading Plan; Traffic Letter; Clark County Archaeological Predetermination Survey for Breeze Creek Trails Subdivision; Critical Areas Report & Mitigation Plan; Arborist Report; Tree Survey Map; Tree Removal and Retention Plan;; Preliminary Landscape Plan; Existing Conditions Plan; Utility Plan

Statement of Determination: As lead agency under the State Environmental Policy Act (SEPA) rules [Chapter 197-11, Washington Administrative Code] the City of La Center must determine if there are potential significant adverse environmental impacts associated with this proposal. The options include the following:

- Determination of Significance - (DS). The impact cannot be mitigated and therefore requires the preparation of an Environmental Impact Statement (EIS).
- Mitigated Determination of Nonsignificance - (MDNS). The impact can be mitigated through conditions of approval, or;
- Determination of Nonsignificance - (DNS). The impacts can be addressed by applying the city cod

Approval Standards/ Applicable Laws:

The following standards will apply to the application: 18.30 Procedures; 18.130 Low Density Residential; 18.147 Parks and Open Spaces; 18.200 General Provisions; 18.210 Subdivision Provisions; 18.240 Mitigation of Adverse Impacts; 18.245 Supplementary Development Standards; 18.280 Off-Street Parking and Loading Requirements; 18.282 Outdoor Lighting; 18.300 Critical Areas; 18.310 Environmental Policy; 18.320 Stormwater and Erosion Control; 18.340 Native Plant List; 18.350 Tree Protection; and 18.360 Archaeological Resource Protection.

Mitigation Measures: The applicant will be required to comply with all applicable approval standards and laws in addition to the following project-specific mitigation measures:

- Earth: The applicant must comply with the design recommendations of the geotechnical site investigation by True Geotechnical Services
- Air: The applicant is required to apply best management practices to reduce dust during construction
- Air: Construction equipment shall not be permitted to idle and is required to be shut off while not in use.
- Water: The applicant shall decommission the existing private well prior to ground disturbance in accordance with Clark County and State of Washington requirements and must provide evidence of the approval and decommissioning in accordance with agency requirements.
- Water: The applicant must use approved erosion control best management practices

during construction in compliance with LCMC 18.320 and the final approved stormwater technical information report.

- Water: The applicant must comply with the recommendations of the Preliminary Technical Information Report.
- Water: The applicant must comply with the recommendations of the critical areas and mitigation report.
- Plants: The applicant shall provide mitigation required by LCMC 18.350 for all trees removed that are not Oregon white oaks on-site of 10 inches diameter at breast height.
- Plants: The applicant shall mitigate for the two priority Oregon white oaks removed in compliance with best available science as required by LCMC 18.300.100 (Best Available Science) and in coordination with the Washington Department of Fish and Wildlife.
- Environmental Health: The applicant shall comply with approved construction hours as required by the City of La Center.
- Environmental Health: The applicant shall decommission the existing septic system prior to construction in accordance with Clark County requirements. The applicant shall provide a lateral sewer line stub to the home so that connection to the public sewer system is available.
- Light and Glare: The applicant shall comply with the requirements of LCMC 18.282 (Outdoor Lighting).
- Recreation: The applicant is required to pay park impact fees prior to issuance of building permits unless otherwise agreed to by the City of La Center, if the City determines the provided park meets the identified community park need for this site shown in the Parks, Recreation, and Open Space Plan in effect at the time of application completeness and the applicant's construction of a that park is determined to be eligible for park impact fee credits.
- Historic and cultural preservation: In the event any archaeological or historic materials are encountered during project activity, work in the immediate area (initially allowing for a 100' buffer; this number may vary by circumstance) must stop and the following actions taken:
 - o Implement reasonable measures to protect the discovery site, including any appropriate stabilization or covering;
 - o Take reasonable steps to ensure confidentiality of the discovery site; and,
 - o Take reasonable steps to restrict access to the site of discovery.

The applicant shall notify the concerned Tribes and all appropriate county, city, state, and federal agencies, including the Washington Department of Archaeology and Historic Preservation and the City of La Center. The agencies and Tribe(s) will discuss possible measures to remove or avoid cultural material and will reach an agreement with the applicant regarding actions to be taken and disposition of material. If human remains are uncovered, appropriate law enforcement agencies shall be notified first, and the above steps followed. If the remains are determined to be Native, consultation with the affected Tribes will take place in order to mitigate the final disposition of said remains.

See the Revised Code of Washington, Chapter 27.53, "Archaeological Sites and Resources," for applicable state laws and statutes. See also Washington State Executive Order 05-05, "Archaeological and Cultural Resources." Additional state and federal law(s) may also apply.

Copies of the above inadvertent discovery language shall be retained on-site while project

activity is underway.

File Name: Breeze Creek Trails Subdivision Type III Preliminary Plat, SEPA, Critical Areas Permits, Variance and Tree Cutting Permit (File# 2024-012-SUB/SEPA/CAR/VAR/TRE)

Attached is a likely SEPA environmental Mitigated Determination of Non-Significance (MDNS) and associated environmental checklist issued pursuant to the State Environmental Policy Act (SEPA) rules (WAC 197-11). The City of LaCenter (lead agency) completed evaluation of the environmental checklist as required by WAC 197-11. You may comment on this likely determination within fourteen (14) days of the issuance of this notice August 22, 2024. The lead agency will not act on this proposal until the close of the **14-day comment period, which ends September 5, 2024.**

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [\[HELP\]](#)

1. Name of proposed project, if applicable:

Breeze Creek Trails Subdivision

2. Name of applicant:

Breeze Creek Trails, LLC

3. Address and phone number of applicant and contact person:

**Peter Schlentz – 19158 Kristen Way San Antonio, Texas 78258
360-606-2787**

4. Date checklist prepared:

March 15, 2024

5. Agency requesting checklist:

City of La Center

6. Proposed timing or schedule (including phasing, if applicable):

The project will construct 15 single family residential lots. The project is scheduled for construction in 2025.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

No, not at this time. The extent of the current subdivision is shown on the preliminary plans.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

The project will be designed and developed in accordance with state and local requirements for stormwater management, erosion control and any other environmental standards. An EIS is not required for this project. A wetland and habitat report has been prepared for this project and submitted to the City as they are the lead agency. The existing white oak tree will be preserved on the south end of the site.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No pending approvals known for applications which would affect the project.

10. List any government approvals or permits that will be needed for your proposal, if known.

Clark County Health District Review, City of La Center planning, engineering and construction approvals and permits. DAHP review is currently under review for the archaeological pre-determination report. There were archaeological findings on the site and ASCC is recommending additional site work for archaeological if those areas are to be developed. A NPDES permit will be required for construction stormwater and erosion control through the Department of Ecology. The NPDES permit will be applied for after preliminary approval and prior to final engineering approval.

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

Breeze Creek Trails Subdivision proposes a single phased development to construct 15 single family residential lots on 4.87 acres and improve associated roads and urban infrastructure.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic

map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The site is located on the west side of NE Ivy Avenue in La Center, WA. The property does not currently have an address. The parcel number is 986044-822 located in the NW 1/4 of Section 03, T4N, R1E. Vicinity Map, legal descriptions and other maps have been included with the subdivision application. E. 2nd Way is a public road stubbed to the east side of the site and will provide access into the subdivision once extended.

B. Environmental Elements [\[HELP\]](#)

1. Earth [\[help\]](#)

a. General description of the site:

(circle one): **Flat, rolling, hilly, steep slopes**, mountainous, other _____

b. What is the steepest slope on the site (approximate percent slope)?

25-40%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

GeB, Gee Silt Loam on 84.9% of parcel, GeF Gee Silt Loam Loam on 4.6% of parcel, HoB Hillsboro Silt Loam on 6.3% of parcel, and OdB, Odne Silt Loam on 4.2% of parcel.

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No. A geotechnical report has been submitted with this project. No history of unstable slopes or surface indications were found.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

Grading will occur on-site for infrastructure development and home construction. The quantities are unknown at this time.

Approximately 40,000 CY of grading may occur on the site.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

Yes, soil could erode due to exposure to rain or wind during construction.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

Up to 50% of the site.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Silt fence, inlet protection, temp. sediment ponds, mulching and seeding.

2. Air [\[help\]](#)

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Construction equipment will emit exhaust. Air may get dusty during construction. Quantities are unknown.

- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

None known.

- c. Proposed measures to reduce or control emissions or other impacts to air, if any:

Exhaust & muffler systems for construction equipment. Water trucks to wet soil during dusty/dry construction periods.

3. Water [\[help\]](#)

- a. Surface Water: [\[help\]](#)

- 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

A small wetland exist on the site. Breeze Creek is located just north of the project site. This is a perineal stream which flows to the East Fork Lewis River.

- 2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

Yes. There is a small 0.08 acre class 4 depressional wetland on the site. This wetland will be filled to accommodate the proposed homes and roadways. A critical areas report and mitigation plan has been submitted with the preliminary application.

- 3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

Yes. There is a small 0.08 acre, category 4 depressional wetland on the site. This wetland will be filled to accommodate the proposed homes and roadways. A critical areas report and mitigation plan has been submitted with the preliminary application.

- 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

- 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

- 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No.

b. Ground Water: [\[help\]](#)

- 1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

Groundwater will not be withdrawn. Stormwater will be treated and detained and released along existing drainage paths. Stormwater will be treated using wet ponds, filters and/or other approved BMP's. Quantity varies depending on rainfall.

- 2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None.

c. Water runoff (including stormwater):

- 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Detention and metered release is proposed for all the stormwater from this project. Wet ponds, filters or other approved BMP's will be used to treat the contaminated runoff and then it will be released to preexisting runoff locations.

- 2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

- 3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

Detention and metered release is proposed for all the stormwater from this project. Wet ponds, filters or other approved BMP's will be used to treat the contaminated runoff and then it will be released to preexisting runoff locations.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

The stormwater systems will be designed to collect, convey, treat and detain stormwater runoff from the developed site.

4. **Plants** [\[help\]](#)

- a. Check the types of vegetation found on the site:

- ☒ deciduous tree: alder, maple, aspen, other
- ☒ evergreen tree: fir, cedar, pine, other
- ☒ shrubs
- ☒ grass
- ☐ pasture
- ☐ crop or grain
- ☐ Orchards, vineyards or other permanent crops.
- ☒ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- ☐ water plants: water lily, eelgrass, milfoil, other
- ☐ other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

Grass, some trees and shrubs will be stripped for residential home construction.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

Residential landscaping will be added. Some mature trees may be retained in side and back yards of the new homes or in open space tracts wherever possible. Native and drought tolerant plants are proposed in the project landscape buffers.

e. List all noxious weeds and invasive species known to be on or near the site.

Himalayan Black Berry and Reed Canary Grass.

5. **Animals** [\[help\]](#)

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: **hawk, heron, eagle, songbirds**, other:

mammals: **deer**, bear, elk, beaver, other:

fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None.

c. Is the site part of a migration route? If so, explain.

The site is located within what is commonly referred to as the Pacific Flyway. The flyway stretches from Alaska to Mexico and from the Pacific Ocean to the Rocky Mountains.

- d. Proposed measures to preserve or enhance wildlife, if any:

Landscape plantings, buffer plantings and opens space tracts will provide food and cover for small mammals, birds, insects, animals and soil organisms.

- e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [\[help\]](#)

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Electricity or natural gas will be used to heat the homes and electricity for lighting.

- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No. Solar power potential will not be affected by this project.

- c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

Comply with state building and energy codes. Incorporate sustainable building design features like passive solar heating through the use of certain building materials and strategic placement of windows and openings. Utilize efficient building designs to maximize building materials and minimize waste.

7. Environmental Health [\[help\]](#)

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

No.

- 1) Describe any known or possible contamination at the site from present or past uses.

None known.

- 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

- 3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None known. Typical residential uses are expected on the site. Standard construction practices are expected for the buildings.

- 4) Describe special emergency services that might be required.

Fire, Police and Ambulance.

- 5) Proposed measures to reduce or control environmental health hazards, if any:

Public sewer and water will serve the subdivision. Recycling and waste management will be utilized and picked up regularly.

b. Noise

- 1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

Light traffic noise from the surrounding neighboring subdivisions.

- 2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Short term 7am – 7pm construction noise, Long Term will be typical noise associated with residential use.

- 3) Proposed measures to reduce or control noise impacts, if any:

None.

8. Land and Shoreline Use [\[help\]](#)

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

This site is currently vacant. Adjacent sites are zoned residential, public facilities and parks/ open space. Single-family residential homes are located on parcels to the east and south sides. The parcel to the west is vacant. The parcel to the north is La Center Elementary School.

- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

- 1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

- c. Describe any structures on the site.

There are no structures on the site.

- d. Will any structures be demolished? If so, what?

No.

- e. What is the current zoning classification of the site?

LDR-7.5.

- f. What is the current comprehensive plan designation of the site?

UL, P/OS. Urban Low Density for the development area. There is a small sliver of parks/open space zoned property on the south edge of this site that is not being developed.

g. If applicable, what is the current shoreline master program designation of the site?

N/A.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Not at this time but critical areas do exist on the site.

i. Approximately how many people would reside or work in the completed project?

Approx. 38 residents.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any:

None necessary.

L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Access roadway improvements. Residential development with sidewalks will provide pedestrian circulation around and through the site.

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None.

9. Housing [\[help\]](#)

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

15 middle to high income single family homes.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None.

c. Proposed measures to reduce or control housing impacts, if any:

None.

10. Aesthetics [\[help\]](#)

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

Two story wood framed structures (35'). Some form of wood, concrete or vinyl based siding will cover the buildings.

- b. What views in the immediate vicinity would be altered or obstructed?

No large vistas or views will be altered with this project. Only neighbors directly adjacent to the property will have views of the new homes with associated fencing and landscaping.

- c. Proposed measures to reduce or control aesthetic impacts, if any:

Retention of as many existing perimeter site and right-of-way trees/shrubs. This project is also planting street trees, site landscaping and retention of over 1.42 acres of on-site open space in tracts A-G with mature trees and shrubs. This will create significant site screening and habitat for birds and small mammals.

11. Light and Glare [\[help\]](#)

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

Street and house lighting will occur at night. Lighting will be designed to meet city standards and provide safe night time pedestrian circulation. The lighting will be shielded to prevent glare to off-site areas.

- b. Could light or glare from the finished project be a safety hazard or interfere with views?

No. It should not be a safety hazard if shielded properly.

- c. What existing off-site sources of light or glare may affect your proposal?

None known.

- d. Proposed measures to reduce or control light and glare impacts, if any:

Proper orientation and shading or shielding of light sources.

12. Recreation [\[help\]](#)

- a. What designated and informal recreational opportunities are in the immediate vicinity?

La Center Water Trail Park & Kayak launch is west of the site. Playgrounds and ball fields are located to the north at the elementary school.

- b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

This project will pay park impact fees which will help in the future development of parks and recreation facilities.

13. Historic and cultural preservation [\[help\]](#)

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

None known.

- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

An archaeological pre-determination and formal cultural resources survey were conducted in the development area. Pre-contact archaeological sites 45CL1544 and 45CL1545 were identified.

- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The formal cultural resources survey was conducted at sites 45CL1544 and 45CL1545 to assess their horizontal and vertical extent, character, and composition.

- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

A site alteration and archaeological excavation permit issued by the Washington State Department of Archaeology and Historic Preservation will be needed to develop within the archaeological resources. The goal for the project is to avoid these areas and the need for an excavation permit.

14. Transportation [\[help\]](#)

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

NE Ivy Avenue borders the eastern boundary of the site and currently provides access to the site. E. 2nd Street is stubbed to the east edge of the site. This public street will be extended into the site and provide access for the 15 new homes.

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No.

- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

Approximately 60 spaces. No spaces will be eliminated.

- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

E. 2nd Street will be improved to public standards when extended into the site. Onsite road will be constructed to City of La Centers standards.

- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

Approximately 141 trips per day. 11 peak am trips and 14 peak pm trips.

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

- h. Proposed measures to reduce or control transportation impacts, if any:

None necessary. Sidewalks will be provided to connect to existing sidewalks on adjacent parcels.

15. Public Services [\[help\]](#)

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

The finished development will require all public services and they are available to serve the site.

- b. Proposed measures to reduce or control direct impacts on public services, if any.

None.

16. Utilities [\[help\]](#)

- a. Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system,
other _____

**Electricity, natural gas, water, telephone, sanitary sewer
and refuse service.**

- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

**Water: Clark Public Utilities, Sewer: City of La Center,
Electricity: Clark Public Utilities, Telephone: Quest or Comcast,
Gas: NW Natural Gas**

C. Signature [\[HELP\]](#)

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.
